FOIL

- FOIL GEL has been designed for decorations using foil paper. It has a very good adhesion on natural nails, acrylic and gel systems; it is ideal to create any type of lines and drawings. Its great texture leaves a very sticky layer, allowing the foil paper to adhere properly. Once design has been made with the foil gel, cure under UV or LED lamp before adhering the foil paper.

ACRYLIC AND GEL (BUILDER GEL)

ACRYLIC & GEL ES UN GEL ESTRUCTURADOR PRE-MIXTA

PREP THE NAIL:

- 1) Apply Hand Sanitizer.
- 2) Gently file the natural nail and walls with #180/180 file and remove residues.
- 3) Apply NAIL PREP – Dehydrator (not included but recommended) and Xtrabond (primer) for a better adhesion.

ADHERE TIPS:

- 4) Select the correct size. Apply glue on the edge of the tip and make sure to adhere it well all around. Align the tip and press down for 10 seconds, then cut off using a tip cutter. File the nail walls and the area where the natural nail and tip are joined to shape the surface (Mia Secret No Lines – Eraser is optional). Remove the dust residues and apply another coat of Xtrabond (primer) over the natural nail only.

APPLICATION:

- 5) Apply a layer of ACRYLIC & GEL over the nail surface, especially over the area where the natural nail and tip are joined.
- 6) For more strength, use UV Powder by using a glass dropper and apply from cuticle to the edge. The nail will absorb the UV Powder and will have a uniform surface. Cure with a LED or UV lamp for 2 minutes.
- 7) Apply a second layer of ACRYLIC & GEL in case you wish for more thickness and cure again with a LED or UV lamp for 2 minutes. Using Nail Wipes and Gel Cleanser, remove any residue from the nail. Remove excess product with #150/150 file, then erase lines and buff with an emery block.
- 8) In case that you want to add decoration to the nail, make it thin.
- 9) Apply UV Finish Gel and cure with a LED or UV lamp for 2 minutes for an ultra-shine finish.

PREPARACIÓN DE LA UÑA:

- 1) Aplicar Antiséptico (Hand Sanitizer), use un removedor de esmalte para asegurarse que sus uñas estén limpias de cualquier residuo o esmalte.
- 2) Ligeramente lime la cama o base de la uña natural como también los lados de ella, con una lima 180/180 y retire los residuos.
- 3) Deshidrate la uña natural aplicando Nail Prep de Mia Secret y aplique una capa de Xtrabond (primer) de Mia Secret, en la uña natural para una mejor adhesión y larga duración.

ADHERIR TIPS:

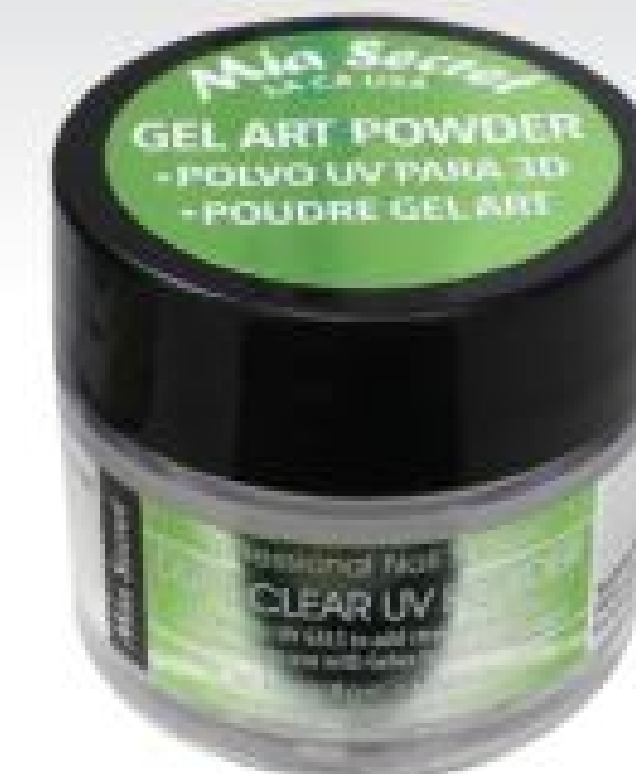

- 4) Seleccione el tamaño correcto. Aplique pegamento en el área de sonrisa del tip, asegurándose que no quede ninguna área sin pegamento y quede más firme; alinee bien su tip y presione por 10 segundos. Corte el tip usando un corta tips, lime los laterales y nivele el tip a la altura de la uña natural. (No Lines – Borrador de Líneas de Mia Secret es opcional), retire el polvo del limado anterior y aplique una capa de Xtrabond (primer) de Mia Secret solamente a la uña natural.

APLICACIÓN:

- 5) Aplique una capa de ACRYLIC & GEL a toda la superficie de la uña, dejando mayor cantidad de éste en la unión del tip y la uña natural.
- 6) Si quiere darle mayor fortaleza, espolvoree con un gotero o herramienta Polvo UV de Mia Secret desde la cutícula hasta la punta del tip, para que el gel absorba el polvo y quede una superficie uniforme. Cúrelo en la lámpara UV por 2 minutos.
- 7) Repita una segunda capa de ACRYLIC & GEL y Polvo UV, si desea mayor grosor, cúrelo de nuevo con lámpara UV por 2 minutos. Utilice Gasas y Gel Cleanser de Mia Secret, para quitar los residuos viscosos, utilice lima 150/150 para quitar exceso de producto y Bloques para quitar bordes y líneas de la lima anterior.
- 8) En caso que desee aplicar alguna decoración, ésta debe ser delgada.
- 9) Aplique una capa UV Finish Gel de Mia Secret, para sellar la aplicación y cúrelo con lámpara UV o LED por 2 minutos para darle un acabado ultra brillante.
